**Whirlpool**  
SENSING WHAT MATTERS

# Designed for your well-being.

Today more than ever, the pursuit of personal well-being is at the centre of life, since everyone feels that balance and serenity are fundamental to live it to the fullest. That's why people constantly look for new opportunities to recharge, grow satisfying relationships, get inspired, exercise creativity and nourish self-growth. Today more than ever, this pursuit starts at home.

In this new scenario, Whirlpool introduces its outstanding **Air treatment range: a complete set of advanced solutions** designed to help **cultivating well-being at home, every day.**

Renowned for their superior performance and intuitiveness, Whirlpool's appliances offer the most fulfilling experience and facilitate people's everyday life thanks to the exclusive **6<sup>TH</sup> SENSE Technology** and a wide range of **innovative features** focused on what really matters at home, from silence to time saving, from hygiene to sustainability.

So that everyone can just enjoy each moment, fully and effortlessly, and always turn it into a new opportunity for well-being.

A close-up, grayscale photograph of a car's interior, focusing on the air conditioning system. The image shows a curved dashboard with a circular air vent and a control panel with various buttons and sliders. A bright yellow rectangular overlay is positioned on the right side of the image, containing the text "Air Conditioning" in a bold, black, sans-serif font.

# **Air Conditioning**

# **Mono-Split connected air conditioners**

simple, high  
technology and top  
performance  
with style

All models are designed to integrate perfectly into the home environment. Thanks to the new **6<sup>TH</sup> SENSE PrecisionControl** technology the air conditioner chooses the ideal operating mode inside the room (cooling, heating, ventilation or dehumidification) based on the temperature of the external environment. The air conditioner then sets the ideal humidity, temperature and ventilation through the new humidity sensor.

## Main features

### 6<sup>TH</sup> SENSE

The **6<sup>TH</sup> SENSE** technology senses, adapts and intuitively controls temperature.

### 6<sup>TH</sup> SENSE Live APP

Remotely control the air conditioner through the app.

### Voice Control

Control your air conditioner simply using voice commands thanks to the connection with your Google Assistant.

### Comfort Sleep

Three functions to guarantee a peaceful sleep: **Silent Mode**, **Dim Function**, **4 Ages sleep mode**.

## Secondary features

### JetFuction

Temperature can be dropped by 5°C in just 10 minutes, ensuring a quick cooling.<sup>1</sup>

### AroundU

A sensor built into the remote helps to provide uniform room temperatures.

### Purification Filtration

A double layer filtration system keeps the air fresh inside your home contributing to the reduction of airborne particles.

### Ecofriendly Gas

R32 refrigerant gas with lower global warming potential.

<sup>1</sup>Test condition settings: indoor temperature 30°C with 40% humidity, outdoor temperature 33°C with 40% humidity. Inverter, 12K BTU tested area 21m<sup>2</sup>, 18K BTU tested area 26m<sup>2</sup>.

### **6<sup>TH</sup> SENSE**Live

With the innovative **6<sup>TH</sup> SENSE**Live technology it is possible to control all the functions of the air conditioner from anywhere and at any time of the day. The air conditioner can be managed intelligently along with other connected Whirlpool appliances.

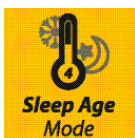

The App, thanks to Wi-Fi, allows to remotely control the temperature and humidity of the home, optimise energy consumption and save on electricity bills. It is possible to connect, check and receive information from other Whirlpool appliances that have this technology.

### **Voice Control**

Switching on the air conditioner while cooking, working on the computer or organizing the grocery shopping is now a reality: all it takes is asking Google Assistant. Thanks to **the ultimate Whirlpool technology** and the partnership with Google, it is possible to **connect the mono-split air conditioners with all the Google Assistant<sup>1</sup> enabled devices**, to switch the air on, set the swing and change the temperature simply using voice commands.

### **Comfort**Sleep

Great performance with three functions to guarantee a deep, gentle and peaceful sleep. The **SilentMode** reduces noise compared to standard mode. With the **DimFunction** the LED panel will turn off at night to avoid any sleep disturbance.

### **4 Ages sleep mode**

**4 Ages sleep mode** offers you the possibility to choose between four night programmes taking care of the whole family.

#### *Adult/Standard mode*

The temperature decreases after the first 30 minutes of sleep and increases at the end of sleep by sensing body temperature.

#### *Child Mode*

For children that are more sensitive to temperature changes, this is more evenly distributed throughout the night.

#### *Elderly Mode*

The temperature follows the standard modality at the beginning of sleep, but decreases further during deep sleep.

#### *Young Mode*

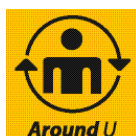

The temperature rises further during the last phase of sleep to facilitate awakening, the rest is similar to the standard mode.

### **JetFunction**

Sometimes you need to chill in a hurry. With the **JetFunction** temperature can be dropped by 5°C in just 10 minutes.<sup>1</sup>

### **AroundU**

A sensor built into the remote, controls the nearby temperature and not just where the indoor unit is helping to provide uniform room temperatures.

### **PurificationFiltration**

A double layer filtration system keeping the air fresh inside your home. The washable dust filter helps trapping dust particles while the HEPA filter (high-efficiency particulate air) contributes to the reduction of airborne particles such as pollen, dust mite, mold spores, bacteria and allergen particles.

### **InverterTechnology**

Adjusts compressor speed efficiently and continuously, according to demand, without temperature fluctuations and no inefficiency. Compared to the traditional On-Off appliance, with two fan speeds only the inverter technology varies the frequency which allows the machine to operate at different speed levels: once the room is at the desired temperature the compressor runs at a much lower speed.

### **EcofriendlyGas**

The new generation R32 refrigerant is extremely energy efficient and environmentally friendly, having less impact on global warming.

<sup>1</sup>Test condition settings: indoor temperature 30°C with 40% humidity, outdoor temperature 33°C with 40% humidity. Inverter, 12K BTU tested area 21 m<sup>2</sup>, 18K BTU tested area 26 m<sup>2</sup>.

# **Mono-Split non connected air conditioners**

simple, high  
technology and top  
performance  
with style

## Main features

### **4D FreeFlow**

The new 4DFreeFlow system evenly distributes cool air thanks to long and multi direction swings that reach every corner of the room.

### **EcoMode**

Whirlpool Eco-mode saves 50%<sup>1</sup> energy consumption compared to high fan setting.

### **SelfCleaning Technology**

This patented self-clean technology quickly disintegrates bacteria, microorganisms, dust and dirt through internal frosting and automatic evaporation.

## Secondary features

### **JetFuction**

With Jet Function you can drop/ increase by +/- 5°C in 10 minutes<sup>2</sup> to quickly reach your comfortable temperature.

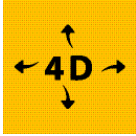

### **Autofunction**

Thanks to the automatic function the product's sensor measures the indoor temperature and settings are automatically adjusted to quickly restore ideal conditions.

<sup>1</sup> Energy consumption saving in 8 hours comparing the consumption of the high fan mode with temperature set at 18°C with the eco mode setting. Test condition settings: indoor temperature 28°C, outdoor temperature 31°C, inverter, 12K BTU split SPICR 312W.

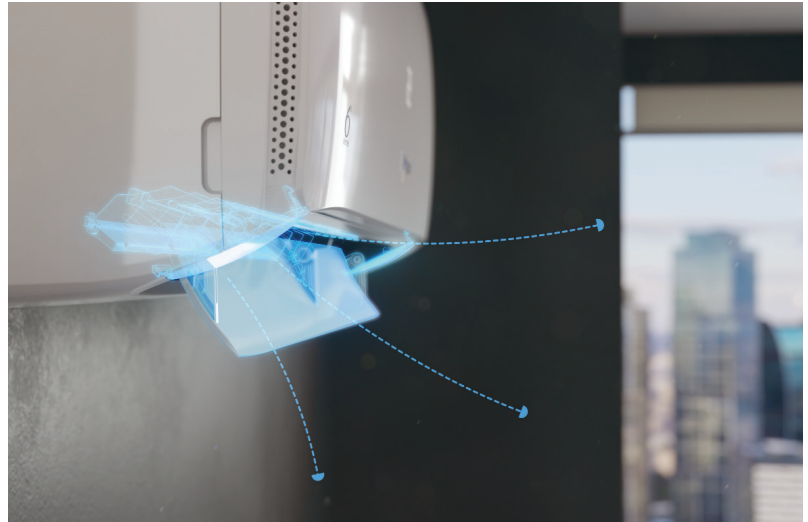

<sup>2</sup> Test condition settings: Cooling indoor temperature 30°C/20°C with 40% humidity, outdoor temperature 33°C/23°C with 40% humidity. Heating indoor temperature 15°C with 50% humidity, outdoor temperature 12°C/9,3°C with 75% humidity. Inverter, 12K BTU tested, test duration 60 min.

### **4D FreeFlow**

A brand new feature that improves air conditioner experience thanks to a different jet air distribution, that allows the same airflow in each corner of the room.

AC's horizontal and vertical wind deflectors are controlled by independent stepping motors. Users can choose between 4 directions of air spread depending on necessity, positioning of people inside the room and number of people. Through two different key buttons customer can set: Up and Down swing or Left and Right swing.

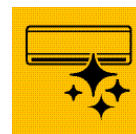

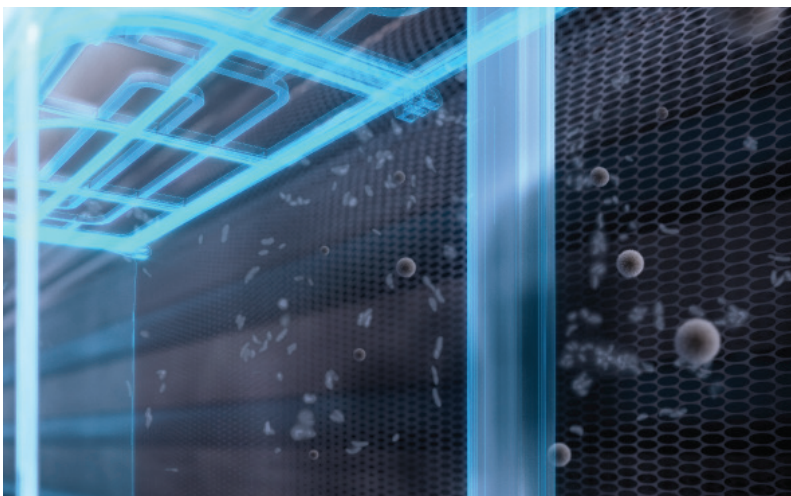

In addition an extra long jet air, up to 12 metres<sup>1</sup>, guarantees fresh air in every point of the room.

### **EcoMode**

In a very easy way users can save up to 50%<sup>2</sup> energy by setting the energy saving mode. The dual-mode inverter technology allows to enjoy the efficiency of the product, saving money and respecting the environment.

### **SelfCleaning Technology**

Thanks to this feature users can keep the indoor air clean and the air conditioner in optimal conditions with minimal efforts. Once activated with a single button on the remote control, this patented self-clean technology quickly disintegrates bacteria, microorganisms, dust and dirt through internal frosting and automatic evaporation.

<sup>1</sup> Maximum distance of air jet flow 8m for SPICR309 (9000 BTU); 10m for SPICR312W (12000 BTU); 12m for SPICR318W (18000 BTU). Internal Test: room size 2m x 12.5m; jet function activated.

<sup>2</sup> Energy consumption saving in 8 hours comparing the consumption of the high fan mode with temperature set at 18°C with the eco mode setting. Test condition settings: indoor temperature 28°C, outdoor temperature 31°C, inverter, 12K BTU split SPICR 312W.

### **JetFunction**

Once the jet function is activated, the product works at high speed mode to quickly reduce or increase the room temperature up to  $\pm 5^{\circ}\text{C}$  in just 10 minutes<sup>3</sup>, allowing to quickly reach the most comfortable temperature.

### **AutoFunction**

Auto Function means no need to think, no hassle of manual adjustments.

A sensor detects the climatic conditions in the room and it consequently chooses the ideal operating mode (cooling, heating, ventilation or dehumidification) to ensure the ideal temperature is established.

### **Compact Design**

New Panel with a very minimal design, smooth curved edges and punched holes on the sides. This new design reduces the air resistance, increasing the circulating air volume. Thanks to this simple and mindful design, it can be installed anywhere in your house or office, always fitting your needs and style, without compromising on performance.

<sup>3</sup> Test condition settings: Cooling indoor temperature 30°C/20°C with 40% humidity, outdoor temperature 33°C/23°C with 40% humidity. Heating indoor temperature 15°C with 50% humidity, outdoor temperature 12°C/9,3°C with 75% humidity. Inverter, 12K BTU tested, test duration 60 min.

# **Free match collection**

Many different  
combinations,  
one solution  
that fits your home

With Free Match, a collection of compact, modular and elegant split units, the advanced performances of the Whirlpool air conditioning multiply. The flexible system allows to always find the ideal solution for the comfort of the entire house, optimizing space and energy performances, while its premium design with high gloss panel and hidden led display ensures a perfect style in each room.

## Main features

### **ComfortSleep**

Three functions to guarantee a peaceful sleep: **SilentMode**, **DimFunction**, **4 Ages sleep mode**.

### **JetFuction**

Temperature can be dropped by 5°C in just 10 minutes, ensuring a quick cooling.<sup>1</sup>

### **AroundU**

A sensor built into the remote helps to provide uniform room temperatures.

### **PurificationFiltration**

A double layer filtration system keeps the air fresh inside your home contributing to the reduction of airborne particles.

### **4D XpertAirflow**

The 3 air-intake vents provide four different air outlet directions, ensuring a more uniform cooling.

<sup>1</sup>Test condition settings: indoor temperature 30°C with 40% humidity, outdoor temperature 33°C with 40% humidity. Inverter, 12K BTU tested area 21m<sup>2</sup>, 18K BTU tested area 26m<sup>2</sup>.

### **Comfort***Sleep*

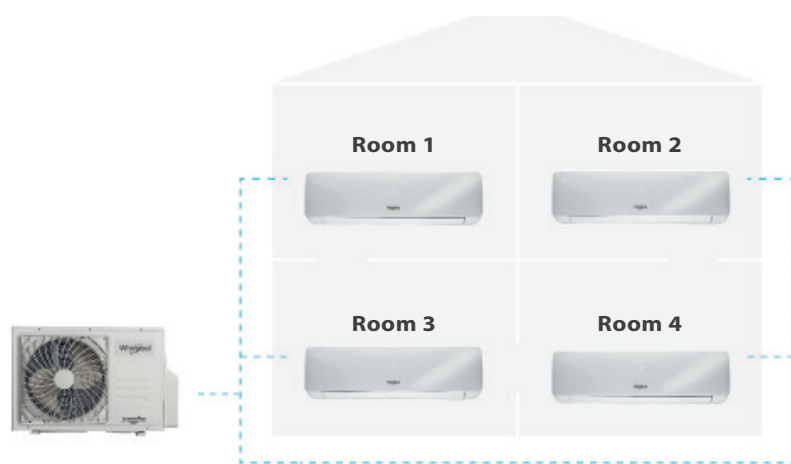

A unique trio of features for long and deep sleeps. The **SilentMode** provides noise reduction of the air conditioner compared to conventional systems. **DimFunction** switches off the LEDs on the panel, preventing light from disturbing sleep. The **sleep Age mode** gives the possibility to have 4 night temperature regulation modes that can be divided according to the age of the people.

## Find the perfect combination, get the ideal temperature.

The flexible Free Match Collection has been designed to offer the perfect solution for every home, thanks to **95 different combinations** that cover every need. Consumers just have to select the best combination for their houses to create their perfect environment effortlessly: there are three efficient external units available, that can serve up to 4 indoor units to regulate and control the interior temperatures of different rooms, according to every requirement.

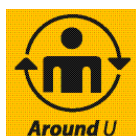

### **JetFunction**

Quick cooling, temperature can be dropped by 5°C in just 10 minutes.<sup>1</sup>

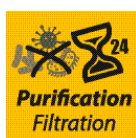

### **4DXpertAirflow**

Four different air outlet directions for a more even and uniform distribution throughout the room.

### **AroundU**

A sensor built into the remote helps to provide uniform room temperatures.

### **PurificationFiltration**

A double layer filtration system keeping the air fresh inside your home. The washable dust filter helps trapping dust particles while the HEPA filter (high-efficiency particulate air) contributes to the reduction of airborne particles such as pollen, dust mite, mold spores, bacteria and allergen particles. Catechin filter helps removing the unpleasant odors such as tobacco smoke and pet smells.

<sup>1</sup>Test condition settings: indoor temperature 30°C with 40% humidity, outdoor temperature 33°C with 40% humidity. Inverter, 12K BTU tested area 21m<sup>2</sup>, 18K BTU tested area 26m<sup>2</sup>.

# Portable

Even more silent<sup>1</sup>  
so you can enjoy  
your relaxing  
moments  
to the fullest.

This air conditioner guarantees a calm and quite ambient so that you can enjoy your relaxing moments to the fullest. High performances comes with a very low noise level, with a minimum of 60 dB.

<sup>1</sup>Referred to 2022 range compared to previous portable Whirlpool models.

## Main features

### AUTO

#### **AutoFunction**

The operating mode more suitable for is automatically selected depending on the ambient temperature detected.

#### **AntibacteriaCoating**

99.9% reduction of bacteria<sup>1</sup> thanks to the new silver ion coated evaporator.

#### **JetFunction**

Quick heating and cooling, +/- 5°C in just 10 minutes<sup>2</sup>.

#### **HeatPump**

Enjoy cool air in summer and warm temperature in winter thanks to the heating function.

#### **EcofriendlyGas**

R290 gas with minor CO2 emission to minimize the impact on environment and global warming.

#### **Dehumidification**

Removes more than 2L of water from the room in 1 hour<sup>3</sup>.

#### **AroundU**

A sensor built into the remote helps to provide uniform room temperatures.

<sup>1</sup>Tested by an independent lab on escherichia coli e staphylococcus aureus according to HG/T 3950-2007 standard. Results obtained in 24 hours.

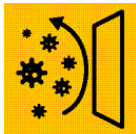

<sup>2</sup>Jet cooling: Referred to PACF212CO W portable model with Jet function. Test condition settings: indoor temperature 30°C, room size 13.9m<sup>2</sup>.

<sup>3</sup>Referred to PACF212CO W portable model with dry function. Test condition settings: indoor temperature 30°C with 80% humidity, room size 13.3m<sup>2</sup>.

### **Auto**Function

Simply press the AutoFunction button and a sensor on the indoor unit detects the climatic conditions in the room. It is then able to identify an optimum combination of functions to bring into action (heating, cooling, ventilation or dehumidification) reaching the desired conditions as quickly as possible.

### **Antibacteria**Coating

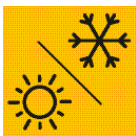

Air is passing through the evaporator and the new silver ion coating prevents the growth of bacteria and mould ensuring up to 99.9% of bacteria reduction<sup>1</sup>.

### **Jet**Function

Thanks to Jet Function this product is the perfect ally to restore the ideal temperature in your room, quickly, all over the year.

+/- 5°C in just 10 minutes<sup>2</sup> as you don't have to wait to fully enjoy your well-being at home.

### **Heat**Pump

The new portable reversible conditioner with heat and cool function always ensures the perfect temperature in every season, for maximum comfort even in winter.

### **Ecofriendly**Gas

Even more ecological with the use of the most modern generation of refrigerant gas: R290, a high efficiency natural gas with no impact on the ozone layer, respecting the environment while ensuring optimal performance<sup>3</sup>.

<sup>1</sup>Tested by an independent lab on escherichia coli e staphylococcus aureus according to HG/T 3950-2007 standard. Results obtained in 24 hours.

<sup>2</sup>Jet cooling: Referred to PACF212CO W portable model with Jet function. Test condition settings: indoor temperature 30°C, room size 13.9m<sup>2</sup>.

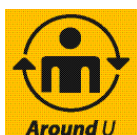

<sup>3</sup>Oxone depleting potential ODP is 0 for R290 gas.

### **Dehumidification**

Ideal room conditions depends also on the humidity level. It has a key role, impacting especially on the temperature perception. You can now easily and quickly manage the humidity level, thanks to the Dehumidification function, removing more than 2L of water from the room in 1 hour<sup>4</sup>.

---

### **AroundU**

A sensor built into the remote helps to provide uniform room temperatures.

---

### **Design**

Now more compact than ever, Whirlpool's new portable line is easy to move around and looks perfect in any room, without compromising on performance.

<sup>4</sup>Referred to PACF212CO W portable model with dry function. Test condition settings: indoor temperature 30°C with 80% humidity, room size 13.3m<sup>2</sup>.

# Air Purifier

Breathe in clean  
air, thanks to 99.9%  
reduction of flu  
virus and bacteria<sup>1</sup>

Home is your personal universe, a place where you can cultivate your well-being every day, where you can relax and find your balance. To achieve all of this, the air you breathe at home plays a crucial role.

That's why Whirlpool offers innovative solutions to improve the air quality in every room. The new air purifier has been designed just for that: it reduces up to 99.9% flu virus and bacteria<sup>2</sup> thanks to the TripleFiltration System that captures and absorbs indoor air pollution, while it continuously monitors air quality and automatically adapts the purification settings, allowing you to always breathe clean air. And thanks to a modern and compact design that integrates in your home seamlessly, it's the ideal solution to turn every space into the perfect one to live new well-being moments every day.

<sup>1-2</sup>Tested by an independent lab for staphylococcus aureus e escherichia coli (according to GBT 18801-2015 and GB 21551.3-2010), for H1N1 (according to Technical standard for disinfection 2002-2.1.3). Results obtained in 1 hour in a 30 m3 room.

## Main features

### **Triple Filtration**

Air is purified in a short time thanks to a triple filtration system.

- Pre-filter: traps large particles such as dust and hair
- Activated carbon: absorbs smoke, odours and harmful gases
- HEPA filter captures smaller particles (up to 0.3 microns) including allergens

### **Air Quality Monitoring**

An advanced sensor measures the room's PM 2.5 level and gives real-time air quality feedback.

### **Auto Functions**

The product automatically adjusts its settings for effective purification.

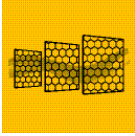

### **Sleep Mode**

Operating at only 33 dBA, guarantees a calm and quiet ambient for your sleep.

### **Touch Display**

A modern and intuitive touch user interface, providing a smooth, effortless user experience.

### **Triple**Filtration

The new Whirlpool air purifier features the advanced TripleFiltration System made of a three-in-one filter and the UV light that work together to ensure a high protection from air pollutants, removing up to 99.9% of flu virus and bacteria<sup>1</sup> in a short time. The pre-filter traps large particles such as dust and pet air, the activated carbon filter absorbs smoke, bad odors and other harmful domestic gas, while the HEPA filter captures smaller suspended particles up to 0.3 microns, including allergens like pollen. Whereas the UV light is used for its sterilization and virus reduction capability. That's how the whole system provides clean air to breathe for your well-being and maximum comfort.

### **AirQuality**Monitoring

The new air purifier allows you to easily monitor the air quality in your home, thanks to a high-precision sensor that detects the concentration of the smaller ( $\leq 2.5$  microns) and more dangerous polluting particles in the room. An intuitive LED display indicates the air quality status and provides clear feedback through three different colors: blue, green and red.

<sup>1</sup>Tested by an independent lab for staphylococcus aureus e escherichia coli (according to GBT 18801-2015 and GB 21551.3-2010), for H1N1 (according to Technical standard for disinfection 2002-2.1.3). Results obtained in 1 hour in a 30 m3 room.

**AUTO****AutoFunction**

Thanks to the useful Automatic Function which can be activated in just 1 click, the air purifier adjusts the settings automatically and accordingly to the quality air status measured by its precise sensor. So that you can always count on an effective air purification in every moment of the day.

**SleepMode**

A calm and peaceful ambient for your sleep is always guaranteed. The air purifier keeps cleaning the air, working in silent mode at only 33 dBA.

**TouchDisplay**

An easy control panel with a touch display is made even more intuitive thanks to LED indicators that always provide live feedback on the actual settings.

**Compact Design**

Thanks to its compact dimension, low weight and mindful design, the air purifier integrates seamlessly in your home and in your office, always fitting your needs and style.

# Professional results. Always.

## Our brand promise

Wpro, conceived from Whirlpool's heritage of over a 100 years of experience and expertise in the manufacturing of home appliances, is the professional solution for all **home services**. Wpro provides a focused range of **specialised products** designed to deliver professional results and which are suitable for **all brands of home appliances**.

# What we offer

## Professional performance

Wpro was born from a professional heritage. Our products never compromise on achieving *professional results*.

## Expertise

Wpro only offers accessories suitable for Major Domestic Appliances and Small Domestic Appliances so we are able to develop a focused range of *specialised products*.

## Universality

Wpro products are suitable for all brands of home appliances.

# Why choose Wpro?

All the Wpro products are **endorsed by the leading appliances manufacturers** which guarantees their professionalism and expert performance. They are all **checked and controlled by our quality department** before they are released on the market to make sure we are providing the right level of performance to our consumers.

# Dehumidifier

up to 30% less  
humidity  
in just 1 hour<sup>1</sup>

Hot summers or cold winters, feeling comfortable indoors is not just a matter of temperature: it's a matter of humidity. And humidity can be an inconvenience all year long, especially at home, the place where you spend most of your time. Whirlpool understands this and introduces the new portable dehumidifier which reduces the humidity of the room by 30% in 1 hour<sup>2</sup>. With a compact and modern design, it's the ideal solution to ensure better air for your home and increased comfort for you, 365 days a year.

<sup>1-2</sup>Testing conditions: room of 20m<sup>2</sup>, dry clothes mode (30% Relative Humidity, High speed).

## Main features

### **6<sup>TH</sup> SENSE**

A smart sensor detects the humidity in the room and automatically adjusts it for true comfort.

## Secondary features

### **LedIndicator**

A 3 color LED lamp helps you understand, at a glance, the humidity level in your room.

### **LaundryProgram**

A dedicated program to reduce laundry drying time by 50%.<sup>1</sup>

### **6,5 L Tank**

High capacity with transparent water level window.  
Easy to empty and clean.

### **DoubleFiltration**

Double filtration for Air purification with anti dust and active carbon filter to help reduce unpleasant odors and dust particles.

### **SleepMode**

All icons will be turned off with one touch.

<sup>1</sup>Test condition: temperature 20°C, relative humidity 48%, comparing drying time of 1.5kg of clothes with and without dehumidifier with laundry program.

### **6<sup>TH</sup> SENSE**

**6<sup>TH</sup> SENSE** Technology ensures humidity control by automatically setting the fan and the compressor speed to reach the optimal humidity level. The Whirlpool dehumidifier has the extraordinary capacity to remove up to 20 L condensation in one day, quickly reducing humidity and restoring thermal well-being for total comfort.

#### *Led Humidity Indicator*

Just look at the LED sensor to know the humidity level of the room thanks to a technology based on a sensor that provides feedback through different colours: blue, green and red.

#### **Blue**

Low humidity level, less than 50%.

#### **Green**

Medium humidity level, between 50% and 70%.

#### **Red**

High humidity level, over 70%.

### **LaundryProgram**

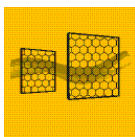

Make sure to prevent humidity and unpleasant odours on clean clothes with the effective laundry program. Thanks to its high fan speed, the dehumidifier reduces the wetness of garments in 50%<sup>1</sup> less time. The result? Less humidity, fresher and better smelling clothes in half the time<sup>2</sup>.

### **6,5 L Tank**

The tank has the great capacity of 6,5 liters and it is easily removable, so draining is easier and less frequent. The water level window allows to check at a glance the moisture collected, while the full water led indicator on the display reminds when unloading condensation water is necessary.

<sup>1-2</sup>Test condition: temperature 20°C, relative humidity 48%, comparing drying time of 1.5kg of clothes with and without dehumidifier with laundry program.

### **Double**LayerFiltration

The dust filter together with the active carbon filter, provide a double layer to absorb and reduce pollution, smoke and bad odours from the air. Bigger particles are caught by the dust filter (pre-filter), then the Activated Carbon filter absorbs smoke, bad odours and smaller pollution particles.

### **Touch**Display

Just one touch to set every function: select the desired program or switch off all the icons when you press the **SleepMode**.

### **Ecofriendly**Gas

Get the most advanced performance effortlessly, saving time in an eco-friendly way. The 20L of dehumidification capacity per day reduces humidity with maximum efficiency. The R290 gas have been chosen by Whirlpool in a perspective of energy and environment responsibility. It is a natural gas that ensures excellent thermodynamic performance with the lowest possible impact on the atmosphere, in particular it is safe for the ozone layer.<sup>3</sup>

<sup>3</sup>Ozone depleting potential ODP is 0 for R290 gas.
